

## The Wittenburg Group ready to attend MedTech Innovation Expo in Birmingham, UK

The [Wittenburg Group](#), a family-owned business and global expert in plastics and thermoplastic elastomer compounds for highly regulated niche markets, will be attending the **MedTech Innovation Expo** in **Birmingham, UK** from **September 28 to 29, 2021** at **stand C50**. Come visit our stand and speak to one of our experts to learn more about our specialty plastics compounds and how we can meet your application needs.

The privately-owned group has over 115 years of history and experience. Out of our three production facilities Wittenburg, Witcom and Xunfeng, we produce Witcom and Cawiton grades to global specifications from our European and Asian facilities.

Our extensive know-how and ability to combine many, often contradictory, properties into one material makes us unique. This creates value for our customers by allowing simplified design which in turn reduces time to market, improves reliability, and minimizes production costs.

We are a chain-oriented company that aims to build long-term relationships throughout the entire supply chain based on trust and respect. Understanding our customer's business and applications allows us to develop solutions that exactly meet their demands. Our team of R&D scientists has in-depth material and application knowledge and can assist you at moulding trials. We also have access to technologies provided by our suppliers and follow the latest trends.

If you are interested in learning more about the Wittenburg Group you can also view our new [Digital Company Brochure](#).

We look forward to meeting you!
