

## The Wittenburg Group ready to attend Pharmapack Exhibition in Paris, France.

The **Wittenburg Group**, a family-owned business and global expert in plastics and thermoplastic elastomer compounds for highly regulated niche markets, will be attending the **Pharmapack Exhibition and Conference in Paris, France on October 13 and 14, 2021** at **booth B88**. Come visit our booth and speak to one of our experts to learn more about our specialty plastics compounds and how we can meet your pharmaceutical packaging needs.

The privately-owned group has over 115 years of history and experience. Out of our three production facilities Wittenburg, Witcom and Xunfeng, we produce Witcom and Cawiton grades to global specifications from our European and Asian facilities.

Our extensive know-how and ability to combine many, often contradictory, properties into one material makes us unique. This creates value for our customers by allowing simplified design which in turn reduces time to market, improves reliability, and minimizes production costs.

Our Cawiton brand has developed specific compounds to be used for primary and secondary pharmaceutical packaging that adhere to the required EU and FDA regulations. Cawiton is your preferred choice if you want to replace your current material solution with a more sustainable solution. We look into every aspect of our supply chain to ensure sustainable business practices are being made, safety is priority so we ensure there are minimal risks for human beings in the end use of consumer products, and we also take the environment into consideration when we design our materials by choosing what makes the least impact on the environment so we can move towards a cleaner, more sustainable future of plastics together.

If you are interested in learning more about the Wittenburg Group you can also view our new [Digital Company Brochure](#) or our [website](#).

We look forward to meeting you!
